

JORGE MATHEUS MOLINA DAVID

(12)98114-5523 - contato@jorgemolina.dev

SUMMARY

I'm open to Software Developer and Data Engineering projects where I can combine my experience in full-stack development (Python, React, Node.js, TypeScript, Three.js) with my background in Big Data processing and pipeline construction (Azure, AWS, GCP, PySpark, Kafka). I'm interested in working on the creation and development of software solutions.

ACADEMIC BACKGROUND

2017- 2023

Chemical Engineering
University of São Paulo (USP)

PROFESSIONAL EXPERIENCE

09/2024- Present

semi Senior Data Engineer

Globant - Remote

- Developed full-stack solutions using Python/Flask and Azure Databricks for processing national-scale records.
- Implemented optimized pipelines and SQL queries for real-time analysis of commercial audits.
- Created enterprise-level React/TypeScript applications with Azure AD (MSAL) authentication and Node.js/Express APIs.
- Architected a scalable backend with Node.js/Express, implementing JWT, rate limiting, and security middleware for enterprise applications.

08/2022- 09/2024

Junior BI Analyst

Mobyman - São Paulo

- Developed and implemented interactive reports using BI tools via Python. Integrated data from various sources, including: Web, SAP, DataLake, external APIs, and SQL databases.
- Utilized distributed systems with PySpark and PySparkSQL. Implemented Big Data solutions on Azure, including Azure Synapse Analytics.

03/2021- 02/2022

Operations Intern

Novelis - São Paulo

- Integrated multiple data sources to generate real-time operational performance reports, using Python, Power BI, and SQL, NoSQL, and Oracle databases

01/2021- 03/2021

Summer Finance Intern

ISAAC - Remote

- Responsible for normalizing financial databases. I used the Python libraries pandas and numpy for data cleaning, processing, and validation.
- Developed and implemented automation scripts using pyautogui and selenium to streamline the normalization process and ensure data accuracy.

COURSES

- **React Applications with AI - Udemy (2025)**
 - Skills: JavaScript, OpenAI API, Node.js, React
- **Next.js E-commerce Bootcamp - Fullstack Club (2025)**
 - Skills: Next.js, TypeScript, TailwindCSS, PostgreSQL, Stripe, Drizzle ORM
- **TypeScript Masterclass 2025 Edition - Udemy (2024)**
 - Skills: TypeScript, React, Node.js, MongoDB, ShadcnUI, TailwindCSS

- **Docker Fundamentals - Udemy (2024)**
- **AWS Certified Cloud Practitioner - Udemy (2024)**
 - Skills: AWS, EC2, S3, RDS, Lambda, IAM, CloudFormation
- **Three.js for Beginners - Udemy (2024)**
 - Skills: Three.js, WebGL, JavaScript, 3D Graphics
- **Artificial Intelligence and Intelligent Agents - Alura (2024)**
 - Skills: LangChain
- **Python for Data Science - Alura (2022)**
 - Pandas, NumPy, Matplotlib
- **Complete Python Bootcamp - Udemy (2021)**
 - Flask, Web Development, Scripting
